4. Conditions

Feasibility, documents, charges and target date are communicated after review. Times depend on carriers and start only after complete acceptance. Mismatched data, non-portable numbers, shared resources, contractual restrictions or carrier refusal may require more information or prevent transfer.

The Customer keeps the current carrier contract active and does not request separate termination until completion is confirmed. Brief interruption may occur. PBX routing is applied only after actual assignment.

5. Authority and declarations

The signatory confirms authority over the numbers, accuracy of the data and authorises CODENEX and the named receiving carrier to perform only the checks and activities needed for portability. Authority becomes operational only after written confirmation of feasibility and commercial terms.

Data is processed for pre-contractual steps, execution and legal obligations under the CloudVoce Privacy Notice. Identity documents must not be sent to general mailboxes where a secure ticket is available.
